PROFESSIONAL SUMMARY HIGHLIGHTS

I partner with leadership to turn data into measurable business value. I design and modernize data platforms that improve decision-making, increase operational efficiency, and reduce risk across the organization. My work spans data engineering, analytics, and business intelligence, enabling reliable, self-service reporting for teams. I am as well exposed to modern AI solutions, including emerging generative AI use cases. I translate business priorities into clear data roadmaps and deliver scalable, secure solutions through strong collaboration with cross-functional teams, driving both commercial and social impact.

SKILLS & TECHNICAL PROFICIENCIES

- **Technical skills:**
 - Dashboarding & BI reporting : (PowerBI,Looker Studio,Metabase, Looker, Tableau), Product Analytics (Google Analytics|Mixpanel), CRM (Hubspot|Salesmate|copper)
 - Data engineering,pipeline development (ETL/ELT/EL), Big Data technologies, data warehousing (BigQuery,Redshift,Snowflake).
 - Data governance & data quality assurance.
 - Data modeling & architecture, MLOps & model operations, performance tuning & scalability.
 - Agile & Scrum methodologies
- **Programming tools & platforms:** Python, SQL, Google Cloud, AWS, BigQuery, SingleStoreDB, Hevo,Looker, Docker, version control (GitHub, Bitbucket)
- **Soft skills:** Stakeholder communication & collaboration, cross-functional facilitation, workshop design & moderation, team leadership & mentorship, problem-solving.

WORK EXPERIENCE

ELEPHANT VENTURES | March 2024 – Current

Data Consultant (Data Analytics & Engineering)

- Building and maintaining dashboards and reports for clients in the fitness, media, and retail sectors, delivering weekly data-driven insights to multiple departments.
- Developed and managed ETL pipelines from various data sources to source, clean, validate, and organize datasets from multiple company customers and outsourced applications and CRM tools.

- Designed and implemented a RAG pipeline POC (Proof of Concept) for a retail client, utilizing open-source LLMs (simulated) and vector databases (simulated) to provide an intelligent search feature over product catalogs, aiming to boost customer engagement by 15% (simulated).

4G CAPITAL | March 2023 – March 2024

Data Analyst

- Synthesized complex data into detailed reports and dashboards using a suite of BI tools, enhancing stakeholder understanding and engagement with key data insights.
- Spearheaded Mastercard Foundation project to put in place Data control and reporting..
- Worked on the automation of manual processes, leading to 23% increased efficiency and accuracy across business operations.
- Managed data storage and analysis, utilizing ETL tools (e.g., Hevo, Stitch) to guarantee an organized and efficient data flow and support ad-hoc analysis requests.

SENDY LIMITED | April 2021 – February 2023

Global Data Analyst

- Managed a comprehensive data pipeline, utilizing ETL tools such as Airbyte and Stitch, to facilitate data integration from multiple sources including Snowflake and CRM systems.
- Transformed raw data into actionable views, executing data cleaning, structuring, and formatting directly within databases, enhancing data quality and readiness for analysis.
- Developed user-friendly data visualizations and reports using BI tools like Metabase, Power BI, and Google Data Studio, translating complex datasets into meaningful business insights.
- Led the support for product and marketing analytics by leveraging tools such as Mixpanel and Google Analytics, crafting visual data representations such as funnels for product evaluation.

TWIGA FOODS | February 2020 – March 2021

Market Intelligence Team Analyst

- Executed comprehensive primary and secondary market research to evaluate growth rates, trends, consumer preferences, and market potential for products and technologies.
- Pioneered the Market Intelligence data team, building data infrastructure from scratch to deliver multiple dynamic reports, supporting strategic planning.
- Communicated research outcomes to executive leadership and broad internal teams, ensuring consensus on market conditions and identification of prime business opportunities.

OMDENA | January 2020 – March 2020

Machine Learning Collaborator

- Collaborated with various machine learning engineers globally to work on a credit model that classifies whether a user will default.

NESTMETRIC MEST INCUBATOR | June 2019 – August 2019

Intern Data Scientist

- Worked with clients to help them understand client behavior using provided historical data to have them base their decisions (current and future) on data.

EDUCATION

- **Msc Big Data** - University of East London - (December 2025 – Present)
- **Bachelor of Science Statistics** - Jomo Kenyatta University of Agriculture and Technology - (September 2015 - November 2019)

AWARDS

- JP Morgan Fintech LLMs ideation Hackathon Prize - Financial Credit bot Reminder
- ML & Analytics Certifications
